

# **Stoney Award**

Mini-grant Program Application

Deadline: November 30

## Proposal Narrative

I. Describe the need for this project.

II. By conducting this project, how will you impact Earth Science Education for your students?

III. What grade level of students will be involved? How many will be involved? What do you expect them to gain from this involvement?

IV. Describe your project. What are your objectives, activities, resources and timetables for the accomplishment of your project?

V. Describe what plan you will use to measure and evaluate your program. At the end of your program, your plan needs to answer these questions:

Did you complete your objectives?

To what degree did you improve student learning, quality of education, or the curriculum?

How do you know that your program had an impact?

What did the students or others think of your program?

What could be changed?

Were there obstacles to your program?

VI. Budget: list your budget request, including descriptions of supplies and materials, transportation or honorariums, including their source and costs.
